

Diode Laser Unmounted Single Emitters and Bars

808nm 200W Unmounted Bar

Semiconductor lasers are the centerpiece of most of today's industrial laser systems. Whether direct material processing or optical pumping of solid-state lasers, fiber lasers or disc lasers, the unmounted single emitters and bars are the key component for the initial conversion of electrical energy into light.

HTOE has been focusing on the semiconductor wafer technology from 1998, delivers the multimode high power at wavelengths between 635 and 1064nm.

- High Power multimode unmounted bars up to 40W CW and 200W QCW output
- Unmounted single emitters up to 2W CW Power
- Available wavelengths include 635nm, 650nm, 808nm, 980nm and 1064nm

Parameters (25℃)

Parameter		Unit	LDAQ1-0808-0200
Optical Parameter	Operation Mode	-	QCW
	Output Power P _o	W	200
	Center Wavelength λ_{c}	nm	808 ± 5
Geometrical	Fill Factor	-	71%
	Number of Unmounted Single Emitters	-	58
Electrical Parameter	Slope Efficiency Es	W/A	≥1.2
	Threshold Current I _{th}	А	≤30
	Operating Current I _f	А	≤200
	Operating Voltage V _f	V	≪4
